Finsbury Mainsflo Pumps

Finsbury Mainsflo Pumps are designed to maintain ideal water pressure throughout the home, no matter how many outlets are in use. This is ideal for houses that struggle with low water pressure, as well as larger homes and families that often need to access multiple water outlets at once.

Suitable for both hot and cold water, the Finsbury Mainsflo Pump eliminates the fluctuations in temperature and flow rate often experienced with pump cycling, and enables constant water flow to all household outlets including showers, taps, washing machines, and hoses.

Pressure Pack

Finsbury Mainsflo Pumps can operate with or without a pressure pack. A pressure pack will decrease the energy costs of running the system as the pump will run only when the pack is empty and stop once it is full.

Heavy Duty Motor

A proven dependable and long-lived power source designed for quiet operation.

Tough Non-Corrosive Design

The pump body is manufactured utilising state of the art plastic moulding and a high grade 316 stainless steel mechanical seal to ensure a long-lasting and corrosion free system.

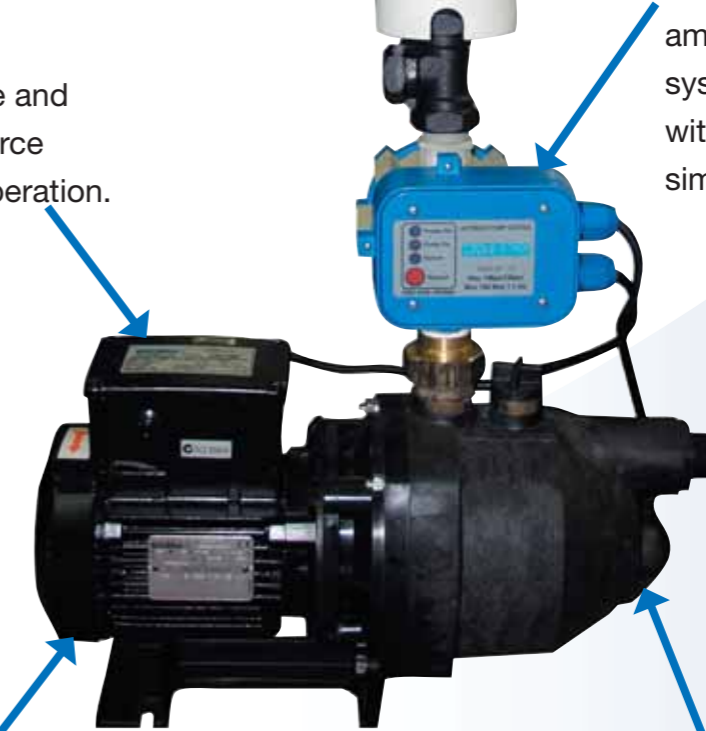

Warranty

Finsbury Mainsflo Pumps are covered by a 12 month warranty against faulty materials and workmanship.

Control Panel

The intuitive design of Waterco's Automatic Pump Control Panel constantly monitors and automatically regulates the amount of water entering the system to provide your household with optimum water flow. It is simple to setup and maintain.

25mm Suction and Delivery

Energy Efficient Impeller

The pump's impeller maximises the hydraulic output of the pump and ensures high performance from the unit. This efficient hydraulic performance shortens run times which reduces energy consumption and lowers operating costs.

* Pressure packs are available in 1, 2.75, & 4 litre sizes.
